

## **Welcome**

Malpractice victims are unique. Unlike those injured from other types of carelessness and negligence, malpractice victims have usually experienced *a loss of trust in their doctor, chiropractor, dentist, or podiatrist*. Because of this, I have come to learn that it is essential to develop a trusting relationship between client and attorney.

With 25 years practicing law and representing hundreds of victims of malpractice, I have created a law practice in which my clients are comfortable knowing that their case is being handled with my personal attention, in the most professional manner, and without unreasonable delays.

As a solo practicing attorney, I will handle every important stage of your case, from your initial interview to the conclusion of your case, either by settlement or trial.

Please call me to discuss your case. If you prefer, you can send an e-mail at [karamlaw@nyc.rr.com](mailto:karamlaw@nyc.rr.com) and include a brief summary of the case.
